Being the most reliable database of digital transactions, it is programmed to record the value of everything. But the question arises is the blockchain technology is really the future of [...]

Is Blockchain Technology Really the Future of the Internet?

Blockchain is still comparable to the Internet of a few decades ago. The Internet we know today looks nothing like it did back then, and the same can be said about blockchain looking forward. In essence, blockchain can add a whole new dimension to the Internet by introducing new standards of data transparency and peer-to-peer communication. A few decades from now, I reckon the blockchain (and IoT) use cases we see today will look like the incredibly slow Internet we saw when it became public ...
