Cisco's IWAN is the solution that gives IT the visibility and control over the network. With Cisco Integrated Services Router (ISR) together with the ISR-AX license bundle, you can run services like Application Visibility and Control (AVC), that gives you visibility to see your network traffic from a Layer 7 point of view and see the actual application name and the protocol that it's using. With more than 1000 application unique signatures that AVC knows how to recognize you will have ...

IWAN Wed: What is Intelligent WAN? - Cisco Blogs

Now, there's an authoritative single-source guide to Cisco IWAN: all you need to understand it, design it, and deploy it for maximum value.
