Construction Equipment Management | Taylor & Francis Group

A construction equipment manager needs to be able to take practical decisions with regards to management of the construction equipment to ensure maximum benefits with minimal expenses for the company. Construction equipment should ideally pay for themselves by helping the owner earn more than it costs to own, operate, maintain, store and use the machine. Operation costs are a recurring expense based on frequency of use while idle sitting machines are a drain to the income.

What is Construction Equipment Management?

Construction equipment management requires real-time visibility and tracking of all of your equipment and tools—the very foundation for profitable construction jobs. Regardless of how you bid the job, you need to accurately track costs, mobilize assets, measure utilization and be able to charge back costs to that specific job site or task.

How to Manage Your Construction Equipment More Effectively ...

Unsafe Construction equipment, key equipment not being delivered on time, poor storage and so on – just a few considerations that must be factored in. Far from a one-off management process, Construction equipment management demands continuous evaluation of every aspect of essential equipment, with a primary focus on quality, safety and cost-effectiveness.

Construction Management Equipment Management course | Reed ...

Construction Management Planning for Equipment. The three most important resources that form the foundation of construction projects are manpower, materials and equipment. Theoretically, these three resources alone are all that's needed to carry out and complete projects successfully. But at the same time, discrepancies in the procurement or use of any of these resources can render the rest redundant.
