The theory of discovery learning assumes that children learn best through experimentation and discovery of facts and relationships on their own. Rather than being asked to memorize facts or learn by listening, children are asked to manipulate materials, experiment, make assumptions and discover by themselves.

Guided Discovery Math Lesson Plans & Worksheets Reviewed ...

The goal of discovery-based math is to make it more meaningful for children. If a child can make the correct conclusions on her own through logical thinking and deduction, the concepts will be easier to remember. However, in a recent study released by the Frontier Centre for Public Policy, the following conclusion was made: "traditional math education methods are superior to the highly ineffective, discovery-based instructional techniques that are in vogue now in educational curricula."
