The education sector is facing a tectonic shift, and the technology upskilling and training market is set to explode. As highlighted by CIO Magazine, C-level executives have repeatedly identified a lack of digital skills as one of the biggest issues facing IT today. Digital skills will continue to be critical regardless of the shape of the economic recovery post-COVID-19.

Tectonic shifts are the direct result of the megatrends we reported on in the previous post and are inextricably connected to them. These tectonic shifts represent concrete, visible, and important changes we will see in our world along the road to 2030. Some people, especially those in affected countries, will notice one or the other, or perhaps several of these trends, but only in "Global Trends 2030" do we see them compiled and connected.

~~*Future Education Tectonic Shift In Paradigm Reality ...*~~

Tectonic shift is the movement of the plates that make up Earth's crust. The Earth is made up of roughly a dozen major plates and several minor plates. The Earth is in a constant state of change. Earth's crust, called the lithosphere, consists of 15 to 20 moving tectonic plates. The plates can be thought of like pieces of a cracked shell that rest on the hot, molten rock of Earth's mantle and fit snugly against one another.
