Cultural or anthropogenic  
eutrophication is the process that  
speeds up natural eutrophication  
because of human activity. Due  
to clearing of land and building of  
towns and cities, land runoff is  
accelerated and more nutrients  
such as phosphates and nitrate  
are supplied to lakes and rivers,  
and then to coastal estuaries and  
bays. Extra nutrients are also  
supplied by treatment plants, golf  
...

Some human traits are  
transmitted biologi-cally, others  
culturally. The color of our eyes  
results from biological  
inheritance, but the native  
language we learned as a child  
results from cultural inheritance.  
Many traits are influenced jointly  
by biological in-heritance and  
environmental factors. For  
example, weight is determined in
