~~The wavelength of yellow light waves is. Convert in to meters.. Substitute for and for in the equation.. Thus, the wavelength of micro waves is.. The thickness of the paper is 0.003 in. Convert into meters.. As the wavelength of yellow light is, the number of waves in the length of is calculated as follows:. Thus, the distance (d) traveled by 131 waves is 131 times the wave length of the microwave.~~

~~I bought this for a graduate level introductory optics course despite already having the 4th edition from an undergraduate course. I struggled with the necessity of buying the new edition at first but have no regrets now. The 4th edition had hardly any example problems throughout the entire text. The author remedied this in the 5th edition.~~
