system as easy as possible, Simplex recommends that you record the Clock ID, Location, IP Address, and Host Name for each unit in the system as it is installed. The Host Name will be visible in most DHCP servers. It should describe the location so that the IP Address of a particular clock will be easy to locate by matching up the Host Name. For example: 3rdFlrConfRm Please see page 53 in the Simplex Ethernet Clock Owner ' s Manual for

Simplex | Replacement Analog Mechanical Wall Clock ...

The Simplex Wireless System allows customer to install clocks themselves. A unique feature of the system is that each wireless clock not only receives the accurate time and corrects itself, if needed; it will also retransmit the time to the surrounding clocks in its area. This way one clock can receive the time signal from multiple directions. The wireless clocks receive and transmit the signal from other clocks on the same floor and / or other floors.

Wireless Clock Systems | Simplex Time Australia

Simplex Wireless Clock Systems. Simplex brand wireless clocks receive GPS or NTP time synchronization from a wireless transmitter. Clocks can either be battery powered or powered by 24VAC / 120VAC, and are easy and inexpensive to install and maintain. The Simplex wireless clock system provides the perfect combination of distance and signal strength to accomodate common building materials, traveling longer distances with less potential for signal interference.
