Short reverb times like this are excellent for speech and music at home (but hopeless in a concert hall). I measured the reverb time for a new and old lab at a school I visited. The old lab was 0.9 seconds (good) but the new one was 1.7 s (awful - too much echo and was much noisier than the old lab).

Senior Physics - Extended Experimental Investigations

There are two key differences between the way cranial nerves (autonomic, parasympathetic nerves) send pain message signals to your brain and the way a common peripheral sensory nerve root (for example: nerve root L4 to your leg) sends pain message signals to your brain: 1) LOCATION of the pain 2) KIND of pain sensation These will be explained ...
